Windows Server Installation

1️⃣ Create new VM

In VirtualBox, click `New`

Set the following:

- Disk size: `60 GB` (SSD)
- RAM: `4 GB`
- Network: `NAT Network`

Boot the VM and install Windows Server.

Login credentials:

- User: `Administrator`
- Password: `Einfach1234!`

Configure Static IP Address

1️⃣ Set static IPv4 address

Open `PowerShell` (as Administrator) and run:

```
New-NetIPAddress -IPAddress 10.0.5.10 -InterfaceAlias "Ethernet0" -DefaultGateway 10.0.5.2 -AddressFamily IPv4 -PrefixLength 24
```

> **Important**
> `Ethernet0` can be different on your system.
> Check with: `ipconfig /all`

Configure DNS Server

1️⃣ Set DNS servers

Run the following command in PowerShell:

```
Set-DnsClientServerAddress -InterfaceAlias "Ethernet0" -ServerAddresses "8.8.8.8", "8.8.4.4"
```

> **Note**
>
> Make sure the `InterfaceAlias` matches your network adapter name.
